

TRAINING MANUALS

The NPC Training Manuals are all attempt at systematizing and consolidating the contents of various training courses in the fields of Industrial Management, Industrial Relations, and Industrial Engineering. They are essentially practice-oriented, illustrating the applied aspects for effective communication to the trainees, and may be useful to meet the needs of Indian industries and other organizations, as they have been prepared by NPC Specialists who have conducted numerous training and consultancy assignments in a wide variety of organisations using different tools and techniques of productivity improvement.
